all measurements are given in finished sizes so ½" should be added for ¼" seam allowances on each side.

Block and Quilt Construction

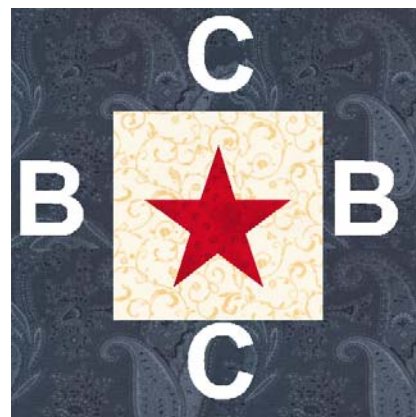

You will need 12 pieced or appliquéd 6 ½" blocks (finished size will be 6").

Step 1: Stitch unit B to either side of your pieced blocks.

Step 2: Stitch unit C to the top and bottom of your pieced blocks. You will have 12 completed blocks.

Step 3: Piece 16 sashing strips

Step 4: Piece sashing rows

Step 5: Piece blocks and sashing rows together.

Step 6: Sew block rows and sashing rows together to complete quilt top.

Lay completed quilt top (minus borders) out flat and measure from top to bottom through the center of the quilt. Use this measurement length to cut the two side borders for the quilt. Laying the quilt out flat, pin the borders to the side edges, easing in any fullness as needed. Stitch the borders to the sides of the quilt with a 1/4" seam. Press seams in the direction of the border.

Step 7: Borders

Lay quilt top with the side borders out flat and measure from side to side through the center of the quilt. Use this measurement length to cut the top and bottom borders for the quilt. Laying the quilt out flat, pin the borders to the top and bottom edges, easing in fullness as needed. Stitch the borders to the top and bottom edges of the quilt with a 1/4" seam. Press the seams in the direction of the border.

Step 8:

Quilt as desired

Step 9:

Bind.
